

Press release – location Istanbul

The A. Stein'sche Mediengruppe opens a location in Turkey/Istanbul

A. Stein'sche Mediengruppe GmbH is continuing to expand. After the takeover of PieperMedia GmbH, this time managing director Alexander Stein drew attention to himself on an international level and set up a branch in the Turkish metropolis of Istanbul.

The Lüneburg library service provider F. Delbanco GmbH, part of the media group since 2022, is to further consolidate its 75-year cooperation with Turkish institutions. In addition to state and national libraries, the customer portfolio also includes ministries and universities. At the beginning, international cooperation initially existed with public and national libraries as well as with the government institution Grand National Assembly of Turkey. This has been expanded to include private library facilities over the years. Delbanco now serves around 50% of Turkey's libraries and universities.

The main contact person in the branch will be Mrs. Hacer Çimen. The librarian, HR and quality manager draws on more than 30 years of professional experience and forms the link between Delbanco and Turkish customers.

With F. Delbanco, JSW, LSL, Ciando and Piepermedia, the Stein media group covers a wide range of library services both nationally and internationally. In addition to e-books, international specialist information and audio books, this also includes procurement processes and tools for processing digital media.

The STEIN media group has been on an expansion course since 2018. With the goal of becoming one of the leading providers in the specialist information trade, Alexander Stein has already acquired companies such as Haufe Discovery, Frohberg and IMS in recent years. The group now comprises 16 domestic locations and 3 foreign locations in Boston, Istanbul and Paris.
